Skills

- HTML5
- CSS3
- JavaScript
- Git & Github

Projects

- **E-commerce Bazaar** [View Live](#) | [View Code](#)
 - **Technologies** : *HTML5, CSS3, JavaScript.*
 - **Description** : A visually appealing and fully responsive frontend designed for an online store. Explore product listings, read blogs, learn about the brand, and easily get in touch through the contact page.
 - Created essential pages, including **Blogs, About, Contact, and Shop.**
 - Implemented **dynamic product listings** on the Shop page.
- **Grill Master** [View Live](#) | [View Code](#)
 - **Technologies** : *HTML5, CSS3, JavaScript.*
 - **Description** : A responsive frontend for a restaurant website, featuring sections like menus, contact, our chefs, and about us.
 - Created visually appealing sections, including **menus, contact, about us, and our chefs.**
 - Ensured the design is user-friendly and can be utilized as a static website for restaurant businesses.
 - Focused on a **clean, attractive layout** to enhance user engagement and experience
- **Food Heaven** [View Live](#) | [View Code](#)
 - **Technologies** : *HTML5, CSS3, JavaScript.*
 - **Description** : A responsive frontend for a restaurant e-commerce web app, featuring sections like menu, about, gallery, review, and order
 - Integrated sections for **menu, about, gallery, reviews, and orders** to enhance user navigation.
 - Enabled users to **view products, add items to the cart, and place orders** through the frontend
 - Focused on creating an engaging and user-friendly interface for better customer interaction.
